A S S O C I A T E

## PROFILE

Colby Egbert graduated from the University of Southern California with a Bachelor's Degree in Architecture. This professional degree gave her a firm foundation of building construction, and instilled a great balance between structural and creative aspects. During her time at USC, Colby realized the designing and constructing process lacked one vital element: illumination. From that point on she was inspired, which led to her career of Lighting Design for Architecture.

## PROFESSIONAL EXPERIENCE
